

Plan submittal check list.

All items must be included before the application can be accepted for review by the City of Auburn. Please indicate that each component has been included by placing a check in the corresponding box.

Completed Not Applicable

Set of electronic plans (PDF format) - emailed to plans@auburnalabama.org

-Floor plans to scale (all levels)

-Elevations

Structural information (slab, floors, walls, ceilings, roof systems)

Engineered component documentation (floor and roof trusses, etc) -

(required for any engineered product that will be used during construction)

REScheck or Prescriptive energy worksheet

Manual J or HVAC prescriptive worksheet - not required if Energy Worksheet is complete

FEMA Elevation Certificate if applicable - (pre-construction forms required before issuance)

Site plan per SITE PLAN SPECIFICATIONS (page 2)

Septic Tank Permit - copy of Lee County Septic Application

State Residential Contractor license is current

City of Auburn Contractor license is current

Before the issuance of any Residential building permit, you must provide proof that the water service fee's have been paid and pre-erosion inspections has passed. These items can be provided or scheduled any time after a permit has been submitted to our office.

Inspection Services is now offering an Online permit portal. The Auburn Permit portal allows you to submit all of your documents Online. You can keep track of the status of your on-going permits and securely pay for the permits Online. You will also be able to schedule inspections and see the comments that inspectors make on specific inspections. If you would like more information about the Auburn Permit Portal visit webgis.auburnalabama.org/permits or call 334-501-3170.

Be sure to use the SAVE AS function when saving this file after filling it out. Please use the lot number and subdivision in the file name when saving. E-mail the completed application to plans@auburnalabama.org along with all plans, site plans and other required documents.

City of Auburn Site Plan Specifications

The following information is required on all site plans that are submitted for all New Residential Construction and additions.

Written Information

- Lot number and subdivision
- Building footprint
- Date
- Name and contact information for design professional
- Housing Type
- Number of Bedrooms per unit
- Number of Stories
- Lot area in Square feet
- Total proposed impervious surface area in square feet (includes all areas covered by pavement **and** structures)

Graphic Information

- Setbacks to property lines from building walls on front, rear, and each side
- North Arrow
- Adjacent street names and R.O.W widths
- Lot line dimensions and bearings
- Scale
- Impervious surface outlines with area in square feet, labeled by type (i.e. driveway, sidewalk, and patio) and shaded or otherwise marked so as to be clearly distinguishable from buildings and other features. Do not include impervious surfaces that are not on the actual lot.
- Utilities (water, sewer, storm, electrical)
- Driveway location
- Easements shown on the final recorded plat
- Porches, patios, decks
- Flood Zones
- Stream Buffers
- Required Minimum Finished floor elevations

STATEMENT OF COMPLIANCE WITH ALABAMA STATE ENERGY CODES FOR RESIDENTIAL BUILDINGS

(2015 IECC with State of Alabama Amendments for Residential Dwellings)

The 2015 International Energy Conservation Code, published by the International Codes Council, when used in conjunction with the State of Alabama Energy and Residential Codes, constitutes the official Alabama State Energy Code for Residential Buildings. This Code establishes minimum regulations for energy efficient design, erection, construction, and/or alternation of one-and-two family dwellings and townhouses not more than three stories above grade in height with a separate means of egress and their accessory structures. Compliance with this Energy Code by designers and builders is mandatory.

This form must be completed entirely, signed and submitted at the time of permit application.

SUBDIVISION: _____ Lot #: _____

JOB SITE ADDRESS: _____

CONTRACTOR/BUILDER: _____

I/we do certify by signature below that the above permitted structure shall be built in compliance with the State of Alabama Energy Codes using one of the following methods: (Indicate with an "x" the appropriate choice.)

Prescriptive Method: Insulation, Window and Door Requirements by Component

_____ This approach is assumed unless documentation is provided by the builder that either the trade-off or simulated performance options are being used. Insulation and window requirements prescribed in the 2015 IECC or Chapter 11 of the International Residential Code must be strictly adhered to in addition to the *mandatory* requirements for building envelope air sealing and mechanical systems (plumbing, electrical, HVAC). Applicants must complete the Energy Code Prescriptive Approach Worksheet and submit it along with the permit application and the construction plans for review. **(See page 3)**

REScheck with 2015 IECC as chosen option (Component UA Trade-off Approach)

_____ Applicant must prepare and submit a REScheck report along with a building permit application, this form, and the construction plans for review. REScheck is available as a free download at <http://www.energycodes.gov/rescheck/>. REScheck allows you to demonstrate compliance with the weighted-average SHGC requirement and to perform simple trade-offs among building envelope components as well as receive credit for higher than standard heating and cooling equipment efficiencies. If using REScheck, you must use the **Alabama** version. Unless you are familiar with using REScheck software, download the 'REScheck Software User's Guide', while at the DOE website. The user's guide is imperative to understanding and using the software program correctly. After download and to establish the correct minimum compliance values for use in Lee County, select the **City of Auburn** as your destination location. REScheck will automatically preset all climatic defaults specifically for *IECC Codes* compliance in Lee County.

Two (2) signed copies of the REScheck printed report for the work to be permitted must be submitted with each building permit application. One copy will be stamped "Reviewed For Codes Compliance" and will be given back to you at permit issue... This copy must be on the construction site and available to inspectors during inspections. The remaining copy will be retained for County records.

Mandatory requirements for building envelope air sealing and mechanical systems must be met even if using REScheck.

Simulated Method: IECC Section R405

_____ Section R405 provides an alternative way to meet the code's goal of effective use of energy based on a comprehensive analysis showing that the predicted annual energy use of a *proposed home design* is less than or equal to that of a *standard reference design* (the same home built to meet the prescriptive criteria in the code). Because of the level of detail required in the analysis, this method is not often used for residential buildings. Please contact the Building Official for more information.

Mandatory requirements for building envelope air sealing and mechanical systems must be met even if using the Simulated Performance Approach.
